About the ACCJC Annual Report

In accordance with ACCJC Policy on Monitoring Institutional Performance and federal regulations, the Commission applies a set of annual monitoring and evaluation approaches that assess an institution's continued compliance with the Commission's Standards and take into account institutional strengths and stability. The Annual Report and Annual Fiscal Report are the primary reporting tools for annual monitoring during an institution's review cycle. Using institutions' self-reported data, the ACCJC Annual Report collects headcount information to monitor institutional growth (including growth in distance and correspondence education) and institution-set standards for key indicators of student achievement, licensure exam pass rates, and job placement rates.

Per federal regulations, the Commission is obligated to report to the Secretary of Education if a college experiences an increase in headcount enrollment of 50% or more in one year. In addition, it provides a framework for ACCJC to ensure colleges are holding themselves accountable for continuous improvement in the context of their unique mission and goals. Each year ACCJC Staff analyze the data and provides a summary report to the Commission describing trends across ACCJC's membership. This includes trends related to overall headcount enrollment growth and decline; headcount enrollment growth and decline in distance education; institution set standards (floor and aspirational goals); and achievement in course completion, certificates, degrees, transfer, job placement and licensure pass rates.

For colleges undergoing a comprehensive review, the visiting team will have the college's most recent annual report as a point of reference. Colleges are also asked to reflect on trends in their institution-set standard data and share their perspectives on student achievement over time in their Midterm Report.

For the purposes of this report, include only those courses that are 100% online in your calculation of unduplicated headcount enrollment for distance education. Do not include hybrid courses or courses in which all the class hours are face to face, but some material is posted online.

IMPORTANT NOTE REGARDING DATA FROM SPRING 2020: When calculating total DE enrollment for 2019-20, please include 100% online courses from summer 2019, fall 2019, and winter 2020. For Spring 2020, please include only courses that were originally scheduled as 100% online. Omit any courses that shifted to a distance modality due solely to the COVID-19 pandemic.]

Correspondence education is defined as education in which (1) the institution provides instructional materials (and examinations on these materials), by mail or electronic transmission (including transmission via learning management system) to students who are separated from the instructor; and where (2) interaction between the instructor(s) and the student is limited, is not regular and substantive, and is primarily initiated by the student. Online courses or online portions of courses which primarily involve "paperwork" (e.g., reading textbook and other materials posted by the instructor, taking examinations, and submitting assignments) will fall within the definition of correspondence education rather than distance education. If the online portion of a class meets the definition of correspondence education, then even if the class also meets on site, it will be considered a correspondence education course for Title IV qualification purposes. Correspondence education is not considered distance education within the U.S. Department of Education definition (see question 8, above).]

[19. Additional Instructions and Data Definitions:

For the purposes of the Annual Report, Job Placement Rate is defined as the percentage of students who are employed in the year following completion of a CTE (career-technical education) certificate or degree program. (This means that the denominator for the 2019-20 job placement rate will be the number of students who completed the program in 2018-19.) Report only those programs with a minimum of 10 students in the completion year. For example, if a program had 9 students complete in 2018-19, you do not need to report a job placement rate for 2019-20. Report only those programs for which reliable data are available. If your institution has defined its job placement rate differently than what is described above, you may complete this question using your local definition provided that you describe this definition in Question 20.]
